

# HTML / CSS Study Time

Here is some optional work to help you study for the upcoming assessment:

Some of the topics covered so far:

- Common HTML elements
- Styling of font size, color, border, and background color
- Arranging content with flexbox
- Position relative and absolute
- Form elements
- Margin and Padding
- Media Queries / Responsive Develop

Be sure you also know how to clone, add, commit, and push to GitHub, as assessments will be submitted using GitHub Classrooms:

- ``git clone <repo url>``
- ``git add -A``
- ``git commit -m "Message describing changes"``
- ``git push origin main``
- If main does not work, try using branch name ``master`` instead!

## Flex Box Defense

### ZyBook Labs:

- 9.8 LAB: Recipe with flexbox
- 9.9 LAB: Media queries for a vacation website

### Practice Assessment #1

- See instructions at <https://lms.grandcircus.co/mod/assign/view.php?id=9939>
